

VERSA-LOK®
Retaining Wall Systems
Solid Solutions.™

StoneEdged™

**HALF BOND
LOOKS BEST!**

The age-old appearance of hand-chiseled stone. The modern technology of the only solid, pinned retaining wall system on the market.

Classical Appearance

The VERSA-LOK StoneEdged option adds an artistically stylish feel to any landscape. It is available in rich colors to blend with or enhance any exterior environment.

At first glance, you'd think that each block was quarried and hewn by hand in the tradition of old-world master craftsmen. The texture is reminiscent of the Renaissance period's expertly handcrafted stone cathedrals and monuments. But this retaining wall is a modern work of art, combining concrete technology and durability with the aesthetic quality of hand-cut stone.

Introducing VERSA-LOK StoneEdged, offering the timeless and stately texture of handcrafted stone along with the same solid construction, design flexibility, and ease of installation found in all VERSA-LOK retaining wall systems.

Create your own classic architecture with the VERSA-LOK StoneEdged texture.
