COMMERCIAL APPLICATIONS

WHY PICK MANUFACTURED STONE VENEER INSTEAD OF NATURAL QUARRIED STONE VENEER ?

- NOT WEIGHT BEARING, NO NEED FOR A FOOTER OR ADDITIONAL REINFORCEMENT AND EXPANSION JOINTS
- COMPETITIVELY PRICED TO BE WELL WITHIN BUDGET CONSTRAINTS
- MUCH LARGER VARIETY OF COLORS AND SHAPES

RUSTIC MANOR LEDGE

Our Rustic Manor Ledge ranges in size from 1½ x 4 inches and 4 x 10 inches for the smaller pieces.

The larger pieces range from 8 x 10 to 16 x 23½ inches.

Proportions are 70% large pieces to 30% smaller pieces.

-Rustic Manor Ledge transports you to a time when each detail was crafted by hand. A place where hand-hewn walls of warm character were inlaid with provincial stone - this series brings that to life. With variegated stone shapes and rough-cut lines, it lends a fetching Italianate look to your project that will exude sophistication.

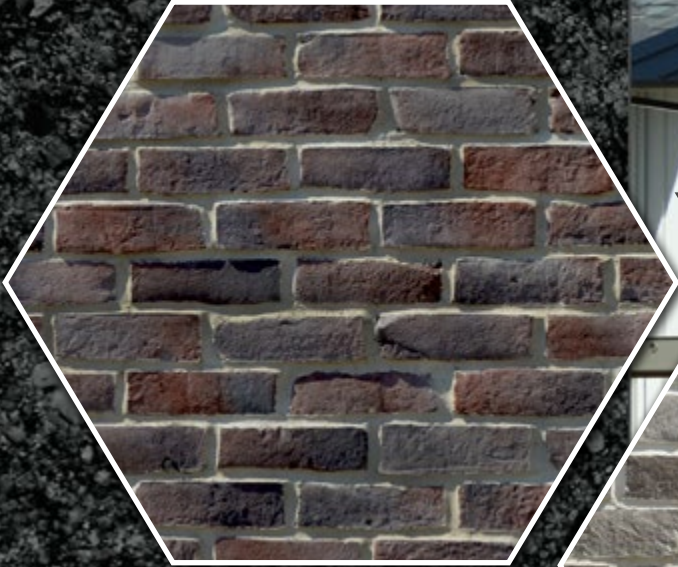

RUSTIC MANOR LEDGE

-Our Thin Veneer Brick is a throwback to when each brick was hand-made and unique. For a rustic flair our brick is perfect on your next project!

WARRANTY INFORMATION

50 year limited warranty from the date of purchase, when installed to manufacturers instructions, and installed according to local building codes. Warranty does not cover damaged product resulting from building settlement, wall movement, improper installation, or discoloration due to airborne contaminants.

Warranty is subject to all other terms of the written warranty, a copy of which can be obtained from your dealer or by visiting www.prestigestoneproducts.com.

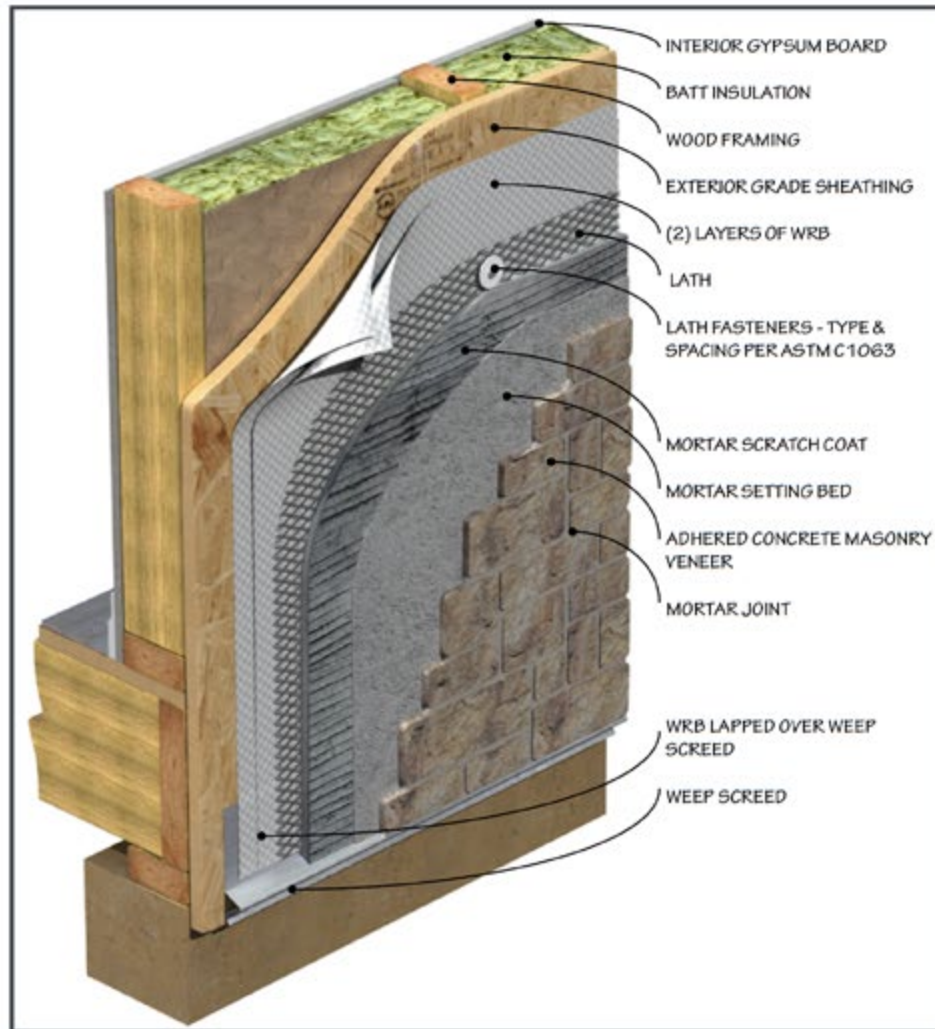

The Contractor and Architect are responsible for proper installation. Prestige Stone Products, llc is not responsible for the structural wall surface it is applied to. Make sure to follow all of your local building codes. Building codes will vary from state to state, county to county.

PORTLAND MIST WEATHERLEDGE

INSTALLATION INSTRUCTIONS

1. Installation Over Wood Framing

Applying the Metal Lath

Apply a moisture barrier of housewrap and 30 pound felt. Overlap horizontal joints 5 inches and vertical joints 8 inches. All corners must be wrapped a minimum of 16 inches. Then apply 2.5 pound metal lath or equivalent. Metal lath must be overlapped in the same manner as the felt. Fasten with wide crown staples at least 1 inch in length. Make sure all chimneys and windows are properly flashed.

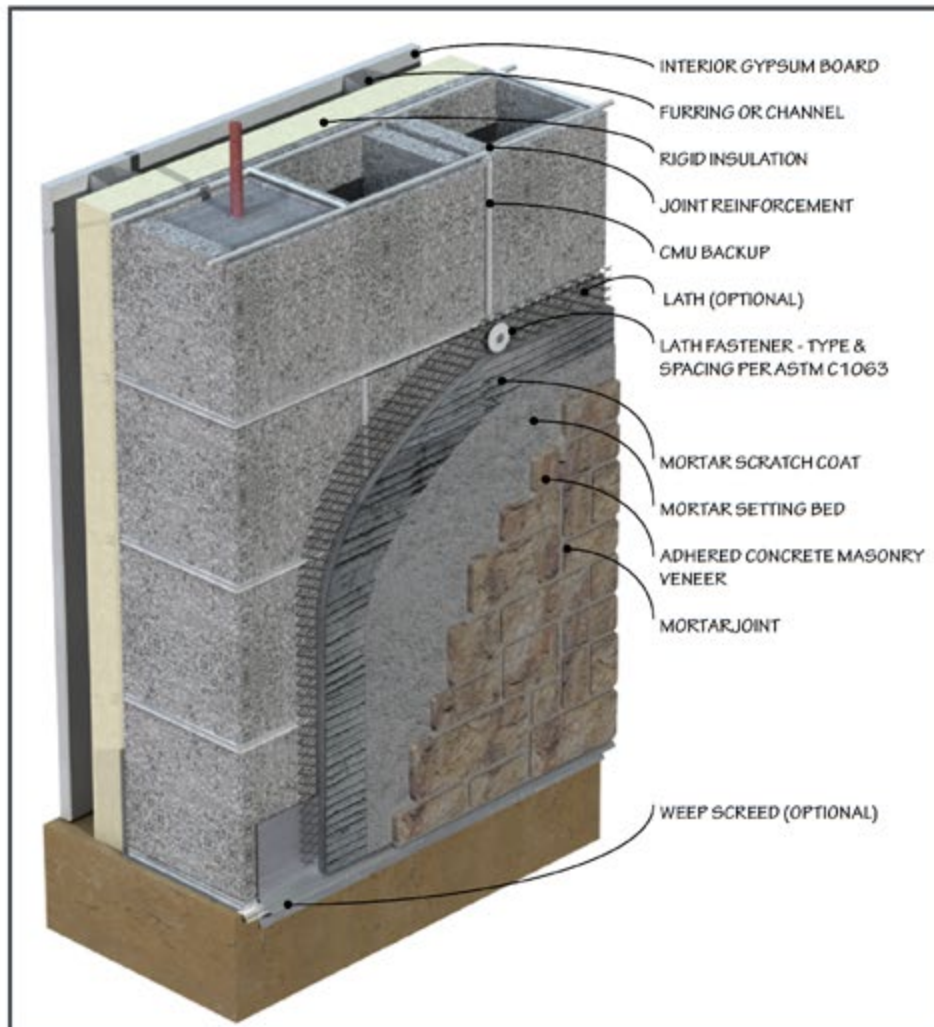

Applying the Scratch Coat

Apply a scratch coat using Type M or Type N mortar, approximately $\frac{1}{4}$ inch to $\frac{1}{2}$ inch thick. Make sure the mortar is not too wet or too dry.

Applying the Stone

Install corners first. Spread mortar evenly on the back of the stone, approximately $\frac{1}{2}$ inch thick. When applying the stone to the wall, move the stone back and forth a little bit in a circular motion. Make sure your mortar is not too dry or too wet for proper bonding. In hot weather you may need to wet down the back of the stone or the scratch coat.

2. Installation Over Concrete Masonry Units

Grouting Instructions

Use a grout bag to grout the joints, making sure you do not get cement on the face of the stone. Let the grout joint set up until it is slightly dry, then strike the joint with a jointer or other similar implement. Make sure it isn't too wet or too dry. If the mortar wets or stains a brush it is too wet. Brush out the joints with a soft brush.
